YOUTH TENNIS

The John and Fay Menard YMCA Tennis Center has all NEW junior programming starting with Red Ball 4-5 year olds to the ACE program for high school varsity players. The Tennis Center Director Matt Boughton (USPTA Elite Professional), Jon Pickett (USPTA Elite Professional), Meg Minton (USPTA Elite Professional), or John Janssen (USPTA Professional) will be happy to assist you in placing your child in the most appropriate group. Please take note that although most groups are categorized by age, ability and maturity are considered in placing youth in the best group for them.

Please keep in mind that a student does not often advance a level each session. Many factors such as attendance, coordination, growth, development (physical, behavioral, and mental), and maturity level affect the student's progression through levels. Remaining at the same level should not be interpreted as not improving or not achieving success. As your child moves up levels in the tennis program, the next level is designed to take longer and to be more challenging. If you believe your child is not improving at the rate of others, please see their instructor for advice.

Participants work with Y staff, who are trained in supportive cancer care to safely achieve goals such as: building muscle mass and strength, increasing flexibility and endurance, and improving confidence and self-esteem. YMCA DIABETES PREVENTION PROGRAM If you are at high risk for type 2 diabetes, this program is for you! The YMCA's Diabetes Prevention Program helps those at high risk of developing type 2 diabetes adopt and maintain healthy lifestyles by eating healthier, increasing physical activity, and losing a modest amount of weight in order to reduce their chances of developing the disease. Research by the National Institutes of Health has proven that programs like the YMCA's Diabetes Prevention Program can reduce the number of cases of type 2 diabetes by 58%. ABOUT THE PROGRAM: In a classroom setting, a trained lifestyle coach will help facilitate a small group of participants in learning about healthier eating, physical activity, and other behavior changes over a 12-month period, beginning with 16 weekly one-hour sessions followed by monthly maintenance for added support to help them maintain their progress. PROGRAM GOALS: Reduce body weight by 7% and increase physical activity to 150 minutes per week WHO CAN PARTICIPATE? In order to qualify for the program, you must be at least 18 years old, overweight (BMI > 25), and at high risk for developing type 2 diabetes. This is indicated by a confirmatory blood value, prediabetes determined by clinical diagnosis of Gestational Diabetes (GDM) during previous pregnancy, or a qualifying risk score. Our next session will run in October - check back for specific date and time.
